

Hazardous Substance Storage Cupboards

Hazardous substances should be locked away in a secure facility when not in use. Moresecure provides a substantial range of storage cabinets to meet the regulatory requirements surrounding use of these materials.

- High visibility yellow ensures awareness of the potential danger of the materials stored and makes location in the workplace easy.
- High visibility labelling conforming to BS5609. Flammable storage labels supplied as standard.
- All steel construction for long life with low maintenance.

All hazardous substance storage cupboards have the following key features;

- Fully welded base sump to eliminate leakage and contain spillages.

- Height-adjustable shelves to maximise space for stored material.
- Reinforced doors with full height door stiffener for added security.

- All units 790mm and above feature 3-point locking for additional security of the contents.
- This is operated by a flush fitting handle designed for easier operation, eliminating the risk of snagging clothes when handling potentially hazardous substances and allowing the door to be closed without the key being inserted.
- Flush fitting handle for smaller cupboards under 770mm with a Camlock as standard.

Independently Assessed to HSG51 and SR24 of the Health and Safety at Work legislation.

H1661HYDYD29S13

- Three shelves
- Three-point locking

Height - 1905mm	
Width mm	Depth mm
477	505

H1961HYDYD29S13

- Three shelves
- Three-point locking

Height - 1905mm	
Width mm	Depth mm
915	505

BioCote® Paint Finish

Epoxy powder coating in high visibility yellow with BioCote® protection.

Yellow (RAL 1003)

In the event of spillage within the cupboard, it is recommended the sump is initially emptied by means of an appropriate pump and the contents disposed of correctly in accordance with the relevant waste management regulations.
