Decorative Surfacing

# Decra™ Stone Resin Bonded

Non-Porous Epoxy Based Surface Dressing finished with your choice of Decorative Aggregate.

## WHAT DOES IT OFFER?

- The appearance of a small grade gravel surface without the inconvenience of loose or migrating aggregate.
- Can be overlaid to existing good quality tarmac or concrete, eliminating the need for costly groundwork.
- Very hard-wearing - suitable for both domestic and commercial/ industrial use to include driveways, paths, public realm areas, car parks and shopping centres.
- Huge variety of aggregate finishes to choose from including natural granites, flints, pebbles and colour coated stone.
- Extremely low maintenance - should be occasionally swept and pressure washed with regular household detergent. No need for specialist cleaning products or equipment.
- Acts as a non-porous surface sealant, dramatically reducing weed growth.
- A standard sized driveway can be completed and ready to use in less than 12 hours\* (\*based on approx 100m<sup>2</sup>)

## ...A little about our Decra™ Stone product

- **Decra™** Stone surfacing can be completed using a wide range of different decorative aggregates, in a variety of colours and textures to complement, enhance or contrast with your surroundings. Please visit the sample page on our website [www.hmslimited.co.uk/aggregate-samples](http://www.hmslimited.co.uk/aggregate-samples) for more information.
- Aggregate sizes are most frequently 1-3mm, 2-4mm, 2-5mm. Smaller aggregates are recommended to give the most aesthetically consistent, uniform finish.
- All of our products are finished with natural aggregates, quarried from various sites from around the UK and abroad. Information on hardness and PSV is available on request.
- **Decra™** Stone is installed using a natural buff coloured, low odour epoxy based binder, to give maximum longevity and blend seamlessly with the natural aggregate dressing.
- More typically used in commercial and industrial settings, granites and bauxites can be coloured coated in a variety of bold colours. Epoxy binder can also be pigmented to add vibrancy to the finished surface.
- Service life for our **Decra™** Stone resin system is approximately 8-15 years, depending on the individual environment and usage.
- Guarantees are offered on materials and workmanship. T&C's Apply.

ALL INSTALLATIONS ARE CARRIED OUT BY ACCREDITED HMS OPERATIVES, NOT THIRD PARTY SUBCONTRACTORS

Decorative Surfacing

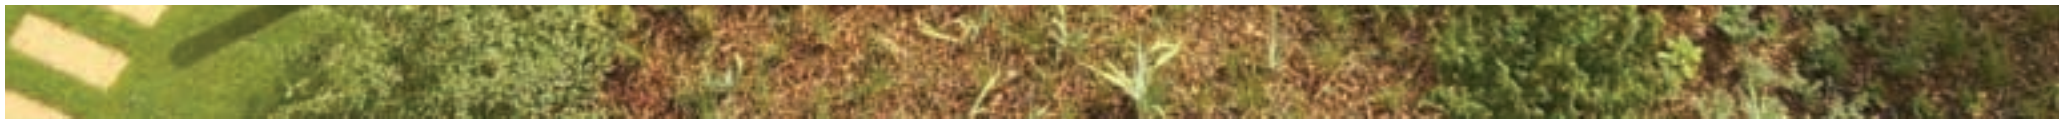

**Decra™ Stone** surfacing can be completed using a wide range of different decorative aggregates, in a variety of colours and textures to complement, enhance or contrast with your surroundings.

Very hard-wearing - suitable for both domestic and commercial/industrial use to include driveways, paths, public realm areas, car parks and shopping centres.

# Decra™ Set Resin Bound

Porous, SUDS Compliant and UV Stable Polyurethane Based Resin Bound Surfacing, Mixed With Your Choice of Decorative Aggregate.

## WHAT DOES IT OFFER?

- Decorative aggregate fully encapsulated in a tough, UV stable clear binder giving a smooth, contemporary finish, with absolutely zero stone migration.
- Can be overlaid to existing good quality open grade tarmac, concrete or compacted Type 1 material, laid to existing edges.
- Fully porous SUDS compliant system, allowing water and air circulation to improve areas prone to standing water, and around trees and foliage.
- Extremely low maintenance - should be occasionally swept and pressure washed with regular household detergent. No need for specialist cleaning products or equipment.
- Very hard-wearing - suitable for both domestic and commercial/ industrial use to include driveways, paths, public realm areas, car parks and shopping centres.
- Huge variety of aggregate finishes to choose from including natural granites, flints, pebbles and colour coated stone.
- A standard sized driveway can be completed and ready to use in less than 24 hours\* (\*based on approx 50m<sup>2</sup>)

## ...A little about our **Decra™ Set** product

- **Decra™** Set surfacing can be completed using a wide range of aggregates and other decorative materials, in a variety of colours and sizes, to complement, enhance or contrast with your surroundings.  
Please visit the sample page on our website; [www.hmslimited.co.uk/aggregate-samples](http://www.hmslimited.co.uk/aggregate-samples) for more information.
- Aggregate sizes are most frequently 1-3mm, 3-6mm and 6-10mm. Usually, a ratio of several sizes will be mixed to create the required porosity and overall finish.
- All of our products are finished with cleaned and dried natural aggregates. Other materials can be used such as recycled glass, rubber or even sea shells to create a truly bespoke finish.
- **Decra™** Set is installed using a UV stable two-pack clear polyurethane binder, mixed with your chosen decorative aggregate mix, before being hand laid to typically 15mm - 50mm, depending the requirements of the finished surface.
- The finished surface is dressed with super-fine sand to give additional traction under foot, making it ideal for areas such as pool surrounds.
- Service life for our **Decra™** Stone resin system is approximately 8-15 years, depending on the individual environment and usage.
- Guarantees are offered on materials and workmanship. T&C's Apply.
