FRESC MANN PREMIUM

ECOLOGICAL EVAPORATIVE COOLERS. 4,200 TO 12,000 M³/H

The portable FRESC MANN and BRIS MANN evaporative coolers are ideal solutions for reducing temperatures in work rooms, in areas where heat collects or in other average-sized spaces, wherever an economical, effective and energy-saving system is needed.

These models can be equipped with a fixed air flow level or with a control panel that allows full adjustment of the flow as necessary.

Some of the manufacturing details include:

- Front air discharge with double-deflection impulsion grill (FRESC MANN model) or top air diffuser with eight discharge ports (BRIS MANN model).
- Basic units with integrated 1-speed electrical panel or electrical panel with frequency converter that allows flow regulation.
- Fan with integrated motor or with clutch system.
- Fan with bonded RAL 7035 gray anti-corrosion treatment (FR-09 / FR-12).
- Anti-corrosion bearings with tank cover included (FR-09 / FR-12).
- Rigid structure made from high-thickness polyamide with interior attachments.
- AISI-304 stainless steel corner posts.
- High-performance cooling panels with protective grills in RAL 7035 gray.
- Nylon wheels for ease of transport.
- 25m hose included with quick-connect system.
- Manual emptying system with corrosion-resistant valve.
- Factory-installed hydraulic and electrical connections.

10-year guarantee for polyamide base and top, 2-year guarantee for other components.

The integrated design and manufacturing carried out by MET MANN has taken into consideration the need for high performance, ease of installation and guaranteed efficiency and durability over time.
