Accessories for use with dispensing systems

www.adhesivedispensing.co.uk

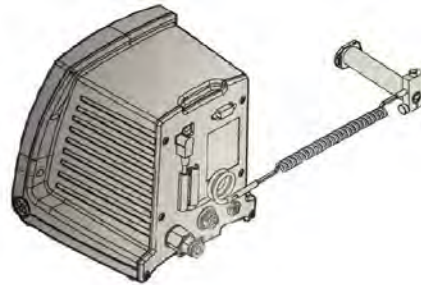

Finger switches are used with benchtop dispensers as an alternative to the foot switch supplied as standard. They connect to the dispenser machine via the foot switch input allowing the operator to control the on/off of the dispenser via a small electric button. A range of styles are available with different connectors to suit different dispenser types as well as versions for specific barrels sizes or universal barrel fit for all sizes.

DX Series

The DX9010 is designed for use with the TS series dispensers. It has a 3.5mm jack plug connection to the dispenser. The 6ft. Long coiled cable is thin and flexible. The syringe barrel pushes into the button assembly and tightens with a nut. This finger switch is compatible with all syringe barrel sizes. The button requires only 5 oz. (1.39 N) of force to actuate. Total switch travel of only 0.050" (1.3mm).

Supplied ready to use with spare rubber O-rings to fit different brands of syringe barrel.
