

# Resin Bound Paving from HMS®

**Decra®Set Resin Bound Surfacing is permeable, SUDS compliant surface system.**

Resin Bound Decra®Set is a permeable decorative surface. The specially designed resin based materials and finishes used are in accordance with the government outlined Sustainable Urban Drainage System, or SUDS, meaning that excess and surface water can naturally drain through the product.

It is made from specially selected natural, coloured or recycled aggregates bound with high performance UV stable resins to produce a long lasting smooth hard-wearing decorative finish.

- Smooth, contemporary finish, with zero stone migration.
- Very hard wearing - suitable for both domestic and commercial/industrial use to include driveways, paths, public realm areas, car parks and shopping centres.
- A wide range of aggregates and other decorative materials, in a variety of colours and sizes available to complement, enhance or contrast with your surroundings.
- Can be overlaid to existing good quality open grade tarmac, concrete or compacted Type 1 material, laid to existing edges.
- Extremely low maintenance - No need for specialist cleaning products or equipment.
- Laid to typically 15mm-50mm depending on the requirements of the finished surface.
- Guarantees are offered on materials and workmanship.
