CREATING OUTDOOR SPACES TOGETHER

We are five brands each offering a unique take on external spaces from playgrounds to public realm we have over 35 years of industry experience delivering high quality and functional outdoor environments efficiently and hassle-free.

Our vision is to build stimulating and functional outdoor spaces, that allow us to thrive and enhance our everyday lives. We believe that investing in well-designed unrestricted urban spaces is vitally important to improve health and well-being for the future.

Part of **CROWD GROUP**

Bailey Street Furniture Group are part of CROWD, the largest street furniture and cycling infrastructure manufacturer in North West Europe.

Creators of the Outside World (Crowd) is a young and innovative group of established companies that is involved in designing and furnishing the public space. CROWD's key focus areas are within Cycling Infrastructure, Shelters and Street furniture.

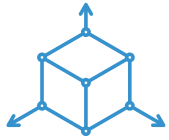

CROWD aims to make a conscious contribution to the living environment of society by developing products which enable modal transport, socialisation, and interaction, along with sustainable and circularity design principles. CROWD's majority shareholder is CONVENT CAPITAL.

CROWD was founded in 2014 and via its buy & build strategy consists of 7 companies, namely VelopA, Ziegler, Ijlander, Cyclepods, Hitsa, Lumiguide and Bailey Street Furniture Group. **Group turnover is more than €125mil, with a total of 7 office locations throughout Europe and 378 employees.**

FROM DESIGN TO DELIVERY AND BEYOND

DESIGN

We have an award winning CAD team who employ BIM methods and can offer full drawings & renders at your request. Of course you will have some questions, and our technical teams will be happy to answer them.

MANUFACTURE

With two manufacturing plants based in Cheshire and Lancashire, we have a combined 40,000 sq ft production facility where we create premium design-led street furniture.

DELIVERY

With our fleet situated at two manufacturing sites we're ideally placed and well-resourced to deliver a fast, efficient service, wherever your project is based.

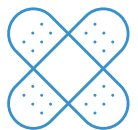

INSTALLATION

From the initial site survey, we provide you with a dedicated installation manager who ensures your project runs smoothly from start to finish, in accordance with our strict Health & Safety and Best Practice.

PROJECT MANAGEMENT

We want to work closely with you to make your jobs easier. As a trusted supplier, we can offer technical advice which can save you time and money. Something that nobody has enough of.

AFTER-CARE

Our work does not end once the project is handed over - our team is here to assist with any issues - and our products come with a warranty of 12 months.

SEATING

Our range of seating products covers all your outdoor landscape designing needs - contemporary, stylish, cool, classic, modern and fun.

Materials used include steel, stainless steel, timber, granite and recycled plastic, and all our Seats are sourced from quality manufacturers from around the world.

As a trusted partner to the UK construction industry, we understand the importance of delivering on both form and functionality when it comes to outdoor seating. Whether you require stainless steel, timber, or a mixture of both, we have a wide range of options to suit your specification and endless possibilities you probably haven't considered.

At Bailey Street Furniture Group, we are the flexible and experienced street furniture experts, so we can cater for your off-the-shelf or bespoke seating needs.

Bespoke Cumaru Seating, Harbour Quay Gardens, Canary Wharf

Greengate - Powder Coated Steel and Sapele Hardwood Seating Range

LITTER BINS

Keeping outdoor spaces clean, safe, and visually appealing is a top priority for communities, businesses, and property owners.

Aesthetically pleasing and functional, our range of litter bins are popular with architects, urban planners, contractors and other construction professionals.

Bailey Street Furniture Group offers a comprehensive range of litter bins that cater to various outdoor environments, from public parks to commercial and residential developments.

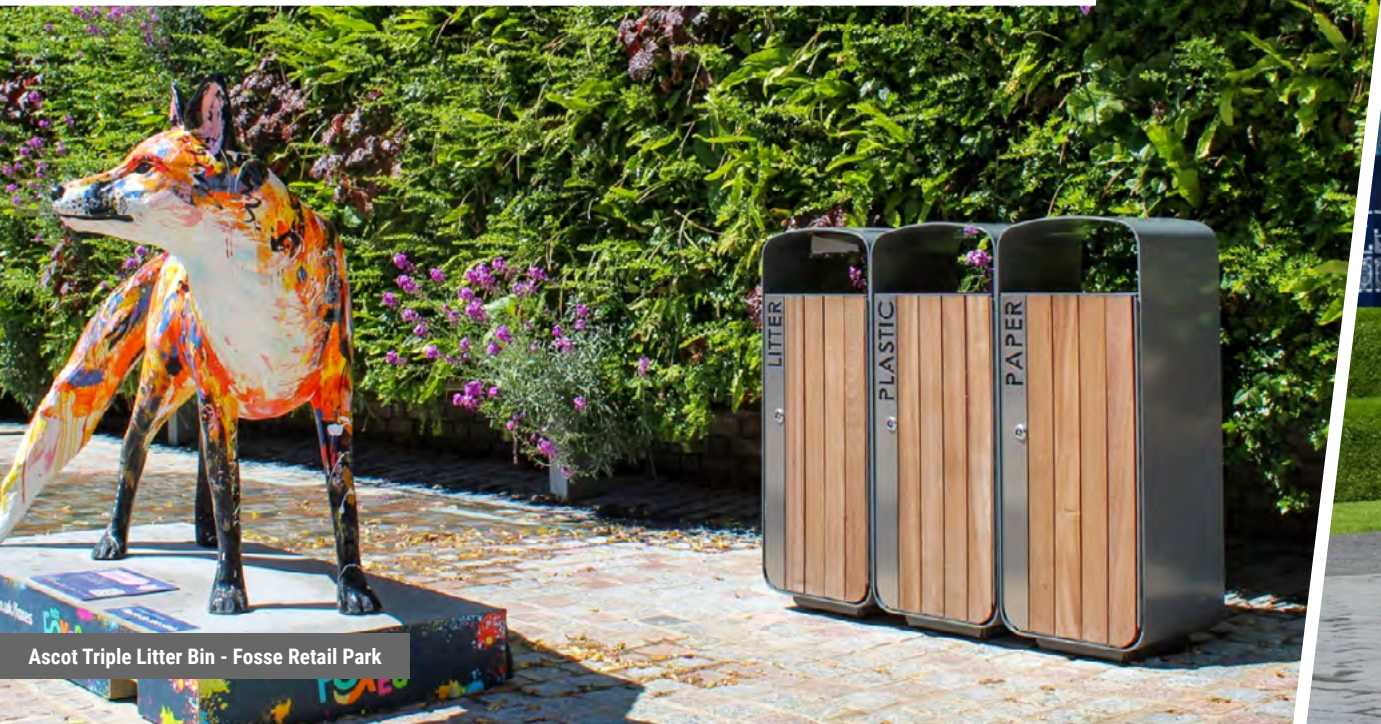

Explore the benefits of our range of litter bins, including design options, materials, and essential factors to consider when choosing the right litter bin for your project.

Spencer Litter Bin - Harper & Keele Veterinary School

Box Litter Bin - Wellington Place, Leeds

Ascot Triple Litter Bin - Fosse Retail Park

Cannock Litter Bin - Tottenham Hotspur Stadium

PLANTERS

Our planters are designed with the environment in mind. Increased green areas make a community more attractive & add a vibrant touch to an otherwise dull or unsightly area.

Bailey Street Furniture Group supplies a wide range of planters with varying designs and materials including timber, steel and cast iron. We also have a wide range of highly attractive steel and cast-iron tree grills too, specially designed to enhance the environment whilst protecting the vulnerable roots and trunks of young trees at the same time.

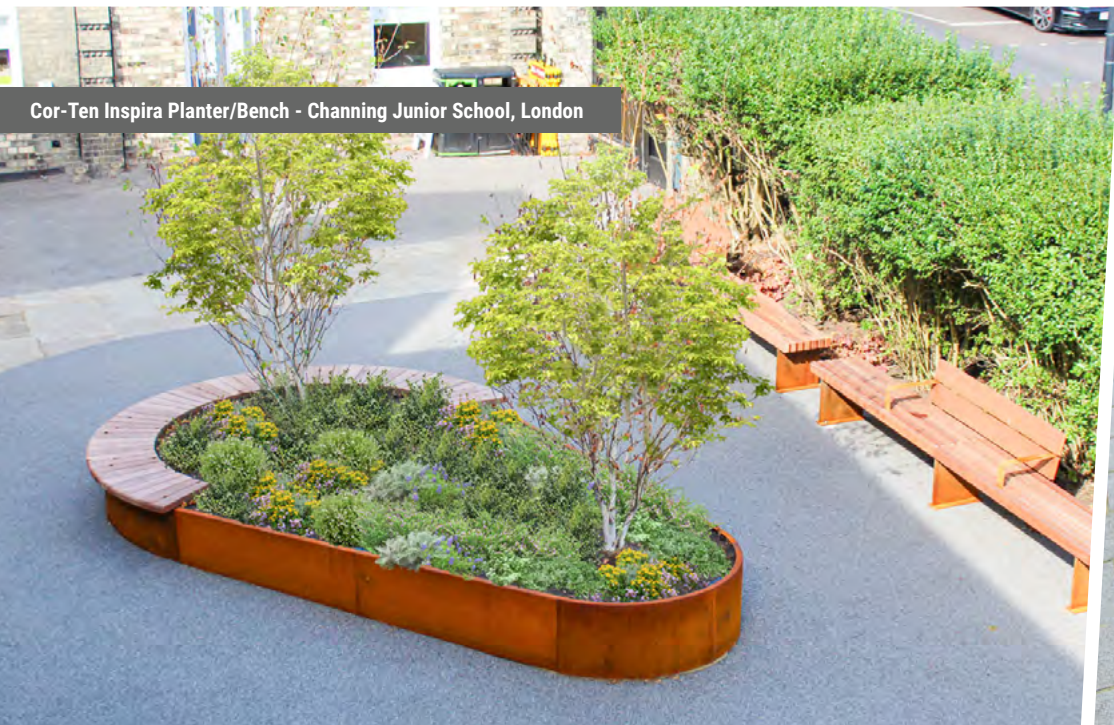

Bailey Street Furniture Group planters are available in a range of sizes to suit any landscape and are extremely versatile: you can plant evergreen shrubs to provide colour all year round in any urban surroundings or even plant seasonal plants which ring the changes with each season.

Inspira Planter Bench - St Marks Student Village, Lincoln

Belgravia Planter - Elizabeth Street, London

Cor-Ten Inspira Planter/Bench - Channing Junior School, London

The Hive, Manchester - Bespoke Inspira Planter

PICNIC TABLES

Picnic sets are a great way to encourage families, friends & employees to spend more time out in their local parks, work places or countryside.

We understand that outdoor eating and socialising is becoming increasingly popular. Our range of Picnic Tables includes a number of different materials including steel, stainless steel, timber and recycled plastic.

Our range of commercial picnic tables and outdoor tables for dining are popular with parks, public spaces and outdoor cafés. From contemporary to classic to rustic, our products and ranges give an inviting presence to an outdoor space.

Brunswick Picnic Table & Bench - University of Manchester

Holgate Picnic Tables - The Catalyst Building, Staffordshire University

Cargo Picnic Table and Bench - Baltic Triangle, Liverpool

Plateau Picnic Tables - Royal Holloway University

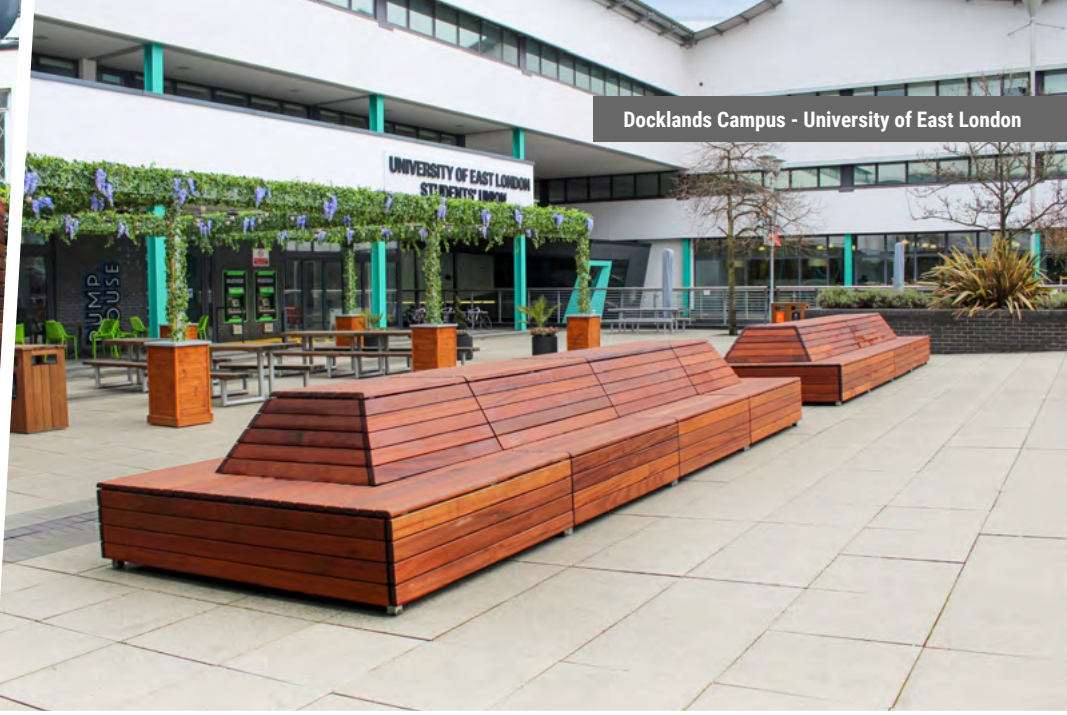

PODIUM SEATING

Podium Seating creates a focal point whether for casual meetings or events. Available in a variety of layouts from L-shaped corner units, long runs or amphitheatres with the option to include a backboard for added privacy and wind reduction.

If you're looking for a centrepiece for social spaces our team can design and manufacture a timber podium arrangement to your exact requirements.

CONCRETE

Bailey Street Furniture Group offers a diverse range of concrete street furniture products, including seating, planters, and more, designed to enhance outdoor spaces with durability and style. Crafted with high-quality materials, their concrete street furniture combines functionality with aesthetic appeal, providing solutions for urban landscapes, parks, public spaces, and commercial environments. From contemporary benches and seating arrangements to robust planters and other architectural elements, Bailey Street Furniture Group's concrete products offer durability, low maintenance, and versatility to meet various design requirements. Whether creating inviting seating areas or adding greenery with planters, their range of concrete street furniture contributes to the enhancement and enjoyment of outdoor environments, fostering community engagement and sustainable urban development.

ROOF TERRACE FURNITURE

Bailey Street Furniture Group presents a comprehensive collection of Roof Terrace Furniture designed to elevate outdoor spaces with elegance and functionality. This range features an array of seating options, planters, pergolas, loungers, picnic tables, and more, each meticulously crafted to enhance rooftop environments. What sets these products apart is their innovative design, offering none or minimal ground fixing requirements to avoid disruption to the roof surface. With a focus on durability, style, and practicality, Bailey Street Furniture Group's Roof Terrace Furniture seamlessly integrates into rooftop settings, providing comfortable seating, greenery solutions, and recreational amenities without compromising the structural integrity of the roof. Whether for residential complexes, commercial buildings, or hospitality venues, this range offers versatile solutions to transform rooftops into inviting and functional spaces for relaxation, socialising, and enjoyment.

CYCLE STANDS

We have a wide selection of cycle stands and racks for a wide range of applications.

From stainless and galvanised steel to powder coated designs – as attractive as they are functional – our cycle stands offer the user safety and security, whilst enhancing the landscape and architecture of any space.

The personal health benefits of cycling have long been recognised, but cycling also benefits the environment by reducing car numbers, cutting down on congestion and improving air quality. By providing cycle stands in schools, offices, town centres and other public spaces you are encouraging people to use their bicycles by giving them a secure place to store them.

By installing cycle stands, you will be offering the necessary facilities so that employees, students, parents, shoppers and other users and visitors can make use of a cost-effective method of transportation. It also encourages people to get outdoors during good weather and to make use of public spaces. That's why our cycle stands deliver

Cafe Cycle Stands - Hudson Quarter, York

Ride Cycle Stand - Islington Square, London

Cyclepods with intergated shelters - Brighton & Sussex University

Streetpods - Sold Secure Diamond Rated Cycle Paking Lewisham Hospital Healing Garden

CYCLE HUBS

Bailey Street Furniture Group are at the forefront of Cycle Hub design and installation. With installations across the UK including Leyton Hub, the **UK's first Secured by Design Cycle Hub**, Heathrow Airport and numerous mainline train stations. Cyclepods provide a full turn key solution for Cycle Hub requirement.

Designed using robust and durable materials, our Cycle Hubs are built to last.

Absolutely everything required for a fully operated Cycle Hub can be included from; **CCTV to solar lighting, swipe card access to green roofs.**

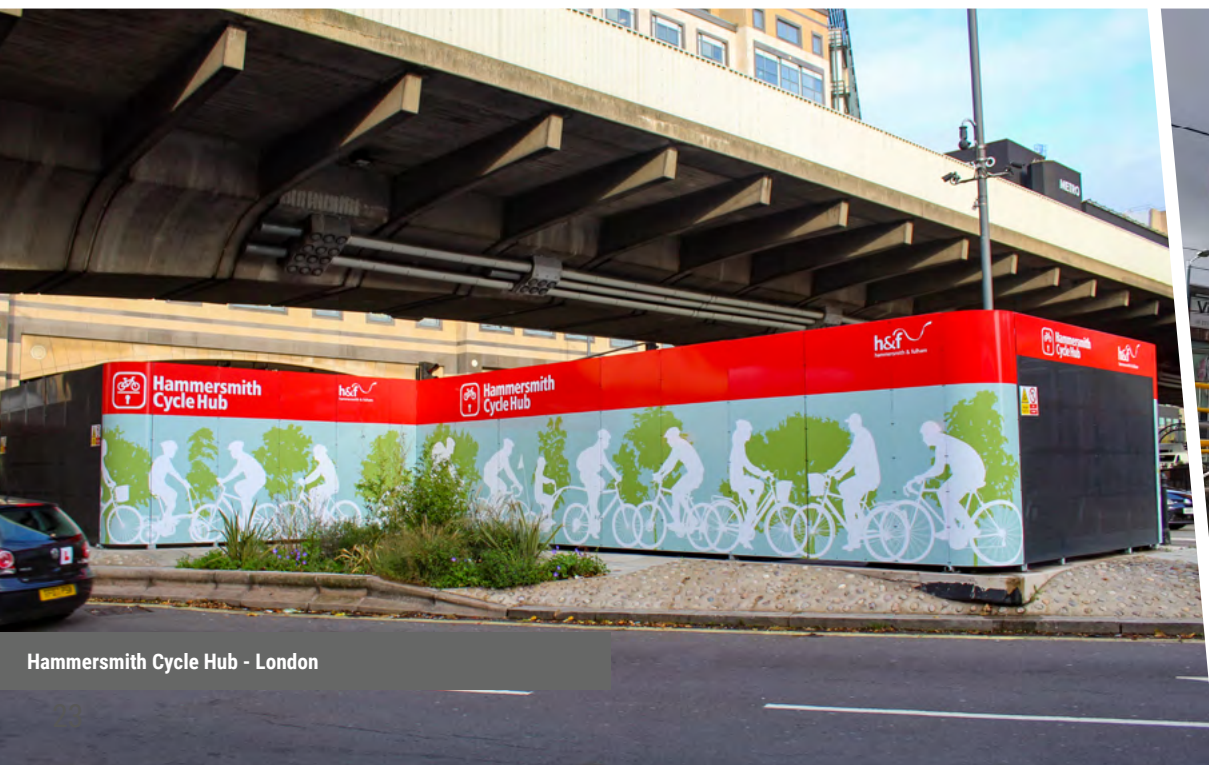

Cyclepods offer a bespoke design service to tailor each Cycle Hub to suit your individual requirements. cycle stands deliver

Cycle Hub for Southwest Trains

Leyton Cycle Hub, London

Hammersmith Cycle Hub - London

Whittleford Cycle Hub - Cambridgeshire

CYCLE SHELTERS

Providing cycle shelters in town centres, schools, office buildings and other public places encourages people to cycle by giving them a safe, dry place to store their bicycles. By installing a cycle shelter, you are offering the necessary facilities so employees, students, parents, shoppers and other users and visitors can make use of a cost-effective method of transportation. It also encourages people to get outdoors during good weather and to make use of public spaces, too.

Bailey Street Furniture Group offers a fantastic range of cycle shelters for organisations of all sizes. Why not choose a cycle shelter that compliments the landscape and architecture of the surrounding area and improves the quality of life for both residents and commuters, too? We have a wide range of cycle shelters to suit all budgets and we can even deliver in 48 hours on selected lines.

Our cycle shelters are constructed from either galvanised steel or powder coated aluminium and will withstand the harshest of weather conditions. For additional longevity all our cycle shelters have UV stable cladding sheets.

Our cycle shelters are manufactured in the UK and backed up by BS EN 1090 certification (traceability, compliance and verification throughout the manufacturing process from the procurement of raw materials through to the final inspection and testing) which ensures you have a safe structure built to last.

CANOPIES

Bailey Street Furniture Group introduces a comprehensive range of Canopies designed to enhance outdoor spaces with versatility and practicality. This diverse collection includes Entrance canopies, Walkways, Canopies for outdoor dining and hospitality, as well as solutions for cycle and vehicle parking, and outdoor classrooms. Crafted with precision and durability in mind, these canopies not only provide shelter from the elements but also add architectural elegance to any environment. Whether creating inviting entrances, facilitating seamless pedestrian movement, providing comfortable outdoor dining areas, or offering secure parking solutions, Bailey Street Furniture Group's Canopies are engineered to meet diverse needs across various sectors. With a commitment to quality craftsmanship and innovative design, these canopies elevate outdoor experiences while promoting safety, convenience, and aesthetic appeal.

BOLLARDS

Our range of bollards are created using a variety of materials, including steel, stainless steel, cast iron, recyclable plastic and timber.

These provide simple, attractive, functional solutions to your street furniture problems, requirements and needs.

We carry a huge range of stock bollards that can be dispatched within days and produce bespoke designs and sizes, with fast turnaround times.

Stainless Steel Bollards - Frederick House, York

Hesperia Bollards - Teesbay Retail Park

Timber Bollards - Canon Green Court, Salford

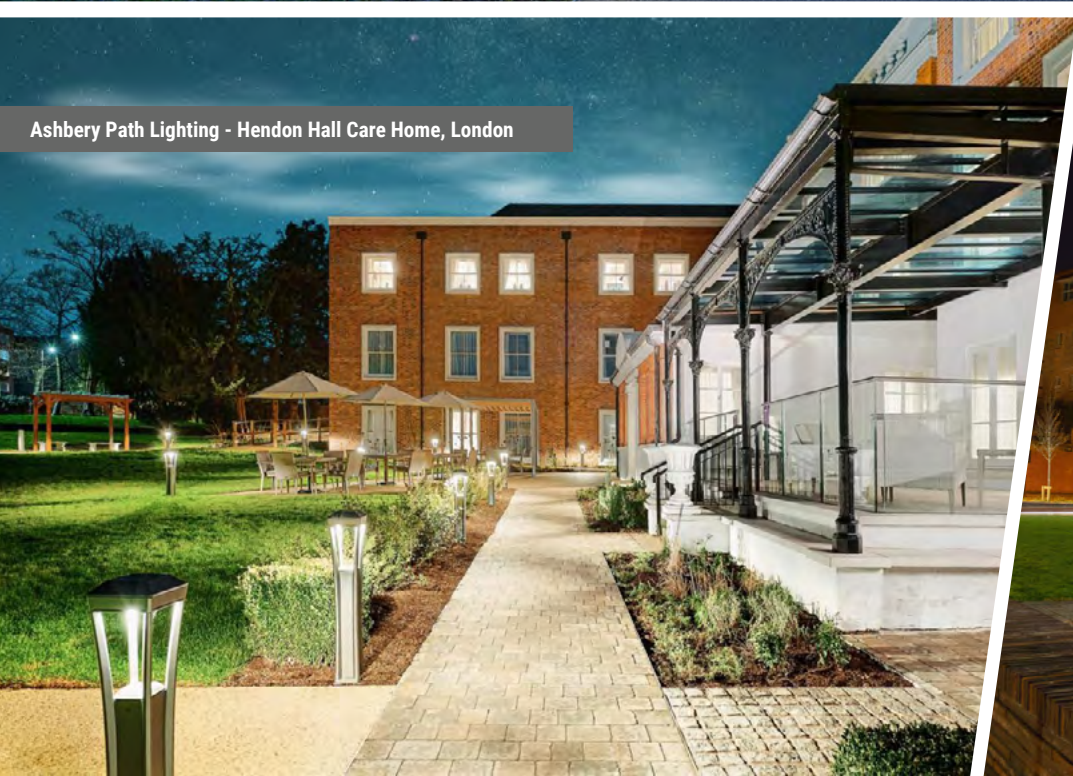

EXTERNAL LIGHTING

Providing cycle shelters in town centres, schools, office buildings and other public places encourages people to cycle by giving them a safe, dry place to store their bicycles. By installing a cycle shelter, you are offering the necessary facilities so employees, students, parents, shoppers and other users and visitors can make use of a cost-effective method of transportation. It also encourages people to get outdoors during good weather and to make use of public spaces, too.

Point Sun Solar Lighting - RHS Wisley Gardens

Ashbery Path Lighting - Hendon Hall Care Home, London

URBAN PROTECTION

Our comprehensive range of street furniture is rigorously tested to meet the IWA 14-1 standards, ensuring security and protection for pedestrians and urban infrastructure while elevating the visual appeal of the surroundings. Our impact-tested street furniture includes seating, cycle stands, litter bins, and planters, all designed and tested to withstand the impact of a 2.5-tonne vehicle traveling at 30mph. Engineered for shallow mounting, our furniture maximizes versatility and minimizes disruption to existing underground infrastructure. With a modular and interchangeable design, our products seamlessly integrate with standard street furniture packages from BSFG, enhancing aesthetics and promoting biodiversity in urban landscapes.

MATERIALS & FINISHES - METALS

GALVANISED STEEL

Advantages

- Value for money
- Corrosion resistance
- Durable
- Low Maintenance

Disadvantages

- Limited Aesthetics

Galvanising is the process of applying a protective zinc coating to steel or iron, to prevent rusting. The process produces a coating which is bonded metallurgically to steel to iron. The most common method is hot-dip galvanising, in which parts are submerged in a bath of molten zinc. The thickness of the galvanised coating is determined principally by the thickness of the steel. This is the standard finish to most of our steel products.

POWDER COATED STEEL

Advantages

- Wide range of finishes
- Non toxic
- Durable
- Low Maintenance

Disadvantages

- Chips - not suitable for all products

Powder coating is a type of coating that is applied as a free-flowing, dry powder. The main difference between a conventional liquid paint and a powder coating is that the powder coating does not require a solvent to keep the binder and filler parts in a liquid suspension form. The coating is typically applied electro statically and is then cured under heat to allow it to flow and form a "skin". Powder coated steelwork provides additional resistance to chips and abrasions.

STAINLESS STEEL

Advantages

- Resistant to Corrosion
- Low Maintenance
- Aesthetics
- Recyclable

Disadvantages

- Susceptible to dents and scratches

We most commonly use Grade 304 and 316 stainless steel with a brushed polished finish.

Brushed Polished Stainless Steel has a unidirectional satin finish and gives metal a distinctive look, as it retains some but not all of its metallic lustre and is given a pattern of very fine lines parallel to the brushing direction.

CORTEN STEEL

Advantages

- Durable
- Low Maintenance
- Environmentally Friendly
- Recyclable

Disadvantages

- Occasional colour run off

Corten Steel is created from subjecting steel to the natural maturation/oxidation process. The metal changes from an orange to dark brown after a cycle of 12 to 18 months. Corten can be sealed, which will reduce the amount of oxide leakage to under 10%. This leakage can saturate into porous surfaces, where the products are located and may leave stains. This is a natural behaviour of the material and must be considered when installing products.

MATERIALS & FINISHES - TIMBERS

EUROPEAN REDWOOD

Wood type: Softwood

Origin: Scandinavia

Colour and appearance: The sapwood tends to be a creamy-white to yellow colour, and the heartwood is usually a yellowish-brown or reddish-brown colour - will weather to grey if left uncoated.

Grain and texture: Grain is generally straight. Medium to coarse texture, with moderate natural luster.

Strength and durability: For its weight, European Redwood is strong and moderately hard.

THERMO PINE

Wood type: Thermally treated Softwood

Origin: Northern Scandinavia

Colour and appearance: In its sawn state, Thermo pine has a uniform chocolate-brown colour tone which will weather to grey if left uncoated.

Grain and texture: Tight grain figuring with an abundance of live (structurally sound) round and splay knots, some of which may display cracks and chipped-off edges after machining, an occasional dead knot cannot be ruled out.

Strength and durability: Exceptional durability (Class 2 - 3 BS EN 350-2) due to thermal modification.

SAPELE

Wood type: Hardwood

Origin: Tropical Africa

Colour and appearance: Heartwood is a golden to dark reddish brown. Colour tends to darken with age.

Grain and texture: Grain is interlocked. Fine uniform texture and good natural luster.

Strength and durability: Moderately durable from insect and rot decay. A common substitute for Mahogany due to its similar characteristics.

EUROPEAN OAK

Wood type: Hardwood

Origin: European Regions, Asia Minor & North Africa

Colour and appearance: A light yellow colour which weathers to a soft silvery grey colour over time and exposure to external elements.

Grain and texture: European oak tends to present a varying wavy grain pattern and a display of mysterious ribbon-like marks.

Strength and durability: Very hard, highly resistant to indentation. Highly resistant to decay and insect infestation. Finishes well.

MATERIALS & FINISHES - CONCRETE

DRESSED FINISH

A dressed finish is the standard finish available on all concrete products. Dressed is a smooth surface achieved by hand rubbing to produce a flat matt surface.

LIGHT ACID ETCH FINISH

An acid etch finish describes varying levels of texture applied by washing the units with varying concentrations of acidic solution. This can be from a light acid etch (similar to an ashlar sandstone / limestone finish) through to a heavier acid etch (similar to a picked / stippled finish).

POLISHED FINISH

An acid etch finish describes varying levels of texture applied by washing the units with varying concentrations of acidic solution. This can be from a light acid etch (similar to an ashlar sandstone / limestone finish) through to a heavier acid etch (similar to a picked / stippled finish).

EXPOSED AGGREGATE FINISH

An exposed aggregate finish uses various techniques to expose the aggregate to produce an interesting and colourful textured finish. Particularly useful to produce decorative solutions to slip hazards or anti vagrant criteria.

We offer a range of concrete colours and finishes - From standard Grey, White & Black options to more unusual colours & mixtures and even luminescent aggregate
