Cartridge gun dispensers are designed for the controlled application of sealants, pastes, gels, adhesives and fluids. High quality cartridge gun dispensing systems. Our guns are covered by a one year warranty and supplied with a basic starter component kit.

The C-110CXO gun is a lightweight, pneumatic operated, high quality dispensing gun designed to accept cartridges for the manual application of sealants, adhesives, potting compounds, and other materials packaged in disposable cartridges or Techkit, Semkit multi-component materials.

They are excellent for the controlled application of silicones, sealants, adhesives, pastes, and other materials. The product is made of metal, aluminium and plastic for tough, durable, long-term use.

A threaded retainer provides a tight fit into the ratchet handle, permitting uninterrupted operation. Suitable for use with 310ml, 10oz or 1/10 Gallon size silicone, sealant, RTV and other materials. Cartridges allow use of standard nozzles. Needle tip adapters can also be used with the cartridges for attachment of all standard needle tips.

Cartridges are inserted into the cartridge gun threaded retainer. This ensures the cartridge does not move under constant use from hand pressure. An adjustable regulator allows user to set the flow rate. All products are industrial grade and are covered by our no-quibble One Year warranty.
